

Ensure you've connected to audio!

Option 1: "Call In"

Follow the process to dial in from a phone

Option 2: "Use Computer Audio"

You must have computer speakers and microphone

After connecting, if you don't see a phone/headset icon next to your name, please attempt to connect your audio again!

**Million Hearts®
Self-Measured Blood Pressure
Monitoring (SMBP) Forum**

September 9, 2021

1:00-2:00 PM EST

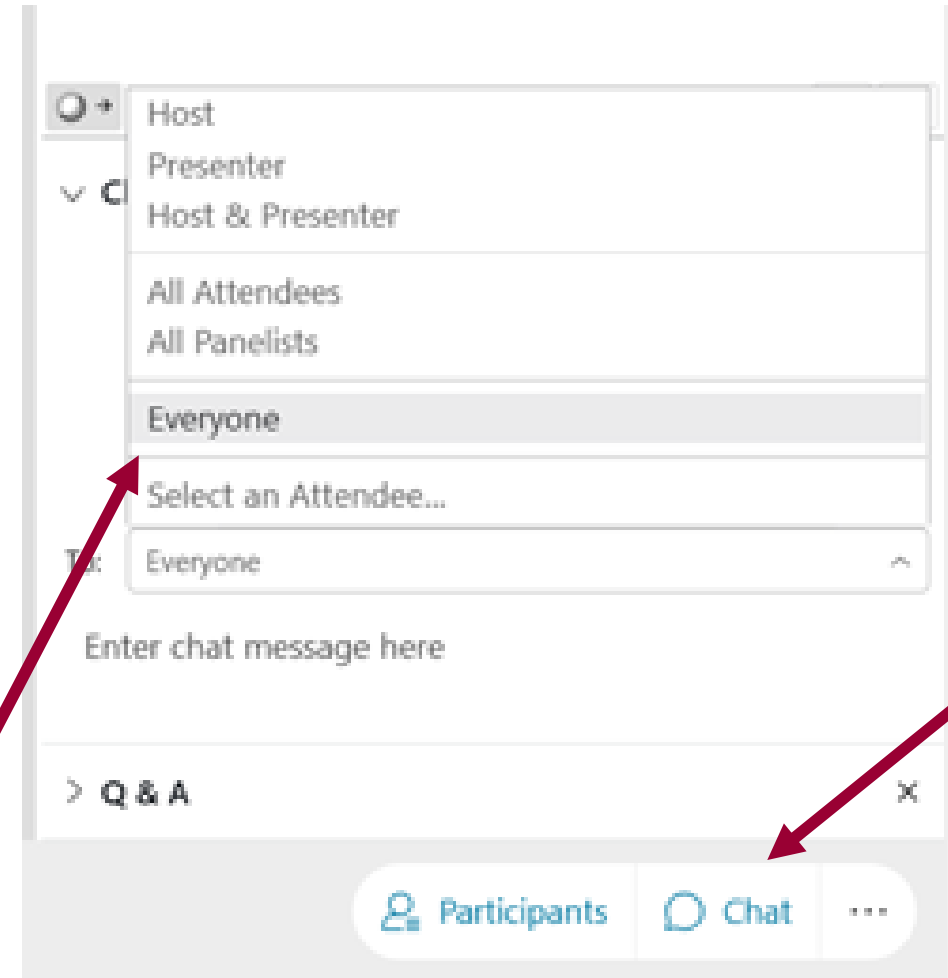

How to Chat

The chat feature is available to pose questions to the group or make comments anytime throughout today's webinar.

Submit to "**Everyone**" and click the send button.

Introduce yourself!

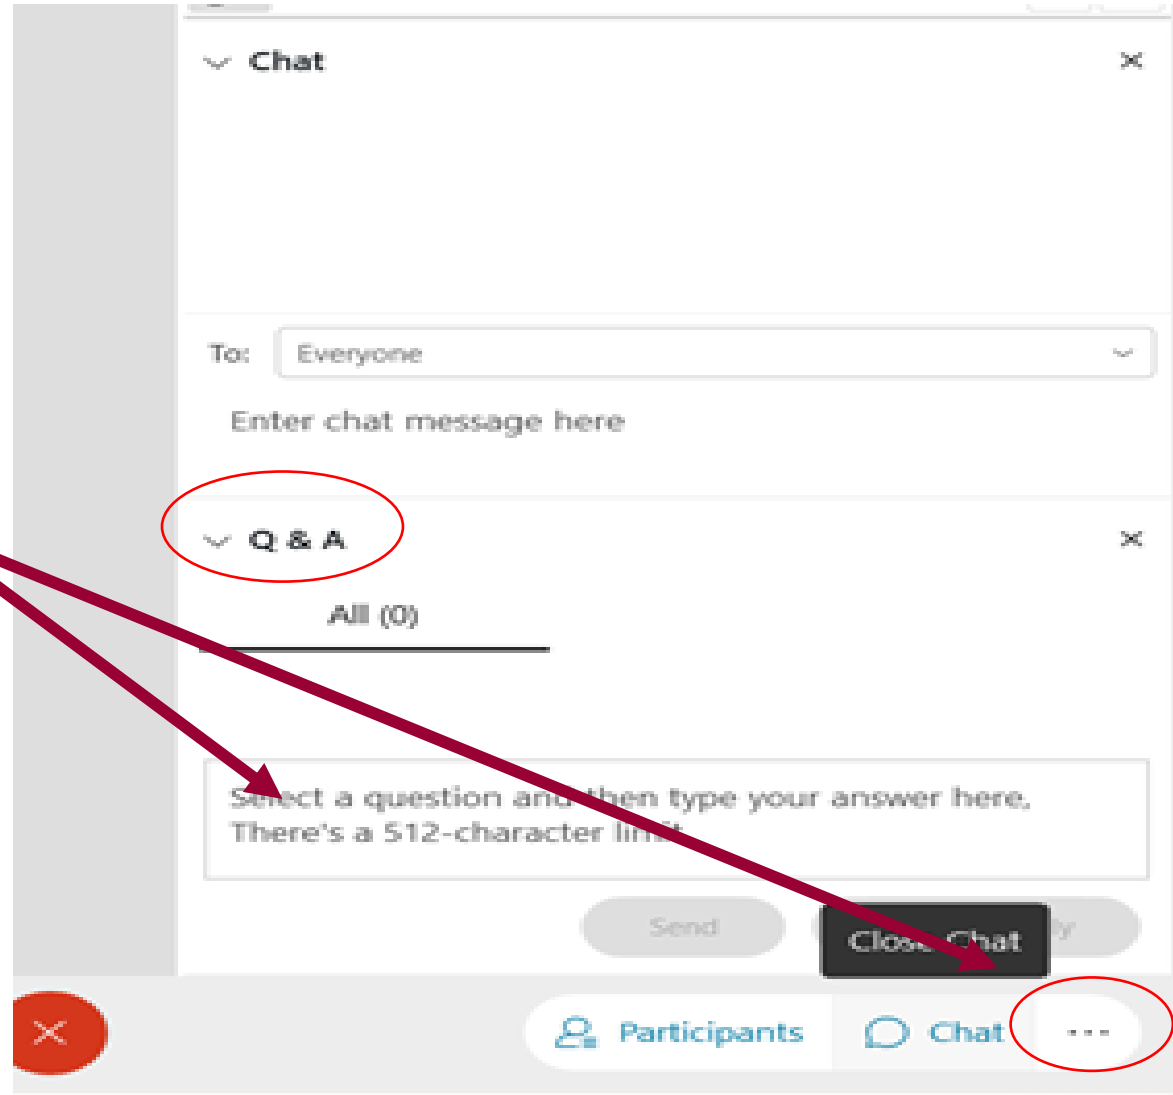

Where are you joining us from?

Submitting Questions

Your questions should be submitted through the “Q&A” box. Questions will be answered by the panelists throughout the session and we highly encourage continued discussion in the chat box throughout the presentation.

Open then “Q&A” box using the ellipses. Questions will be seen by all panelists

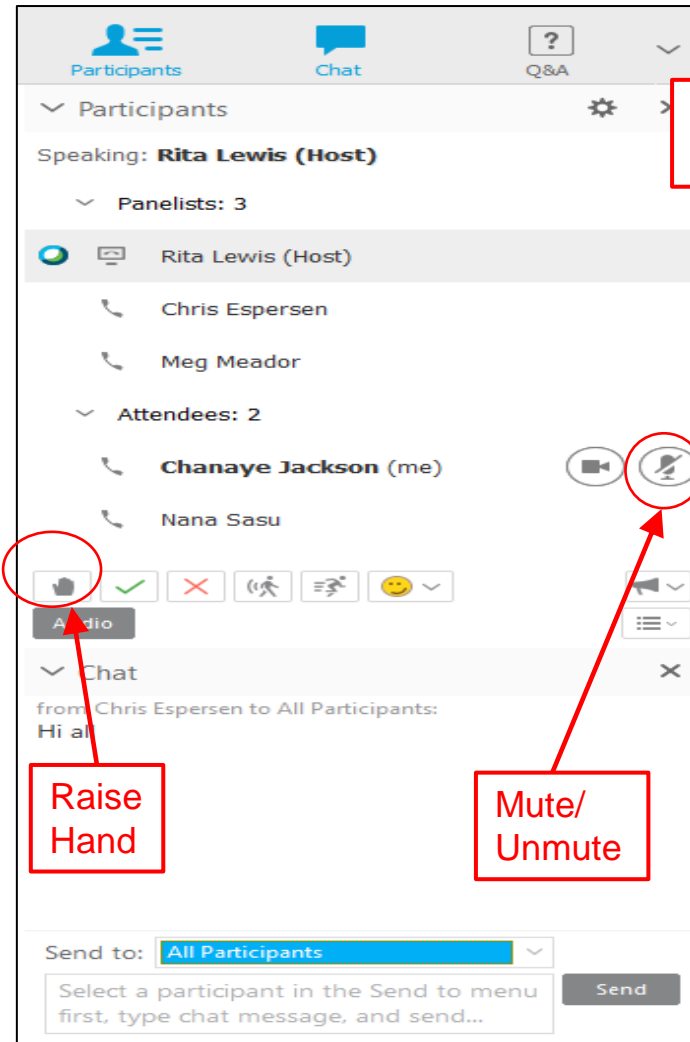

How to Speak and Participate (Computer and Mobile)

Please “**raise your hand**” to indicate to the host that you would like to speak to the Forum.

To do so, click the **hand symbol icon**. Once clicked, a gray hand will appear beside your name in the participant list.

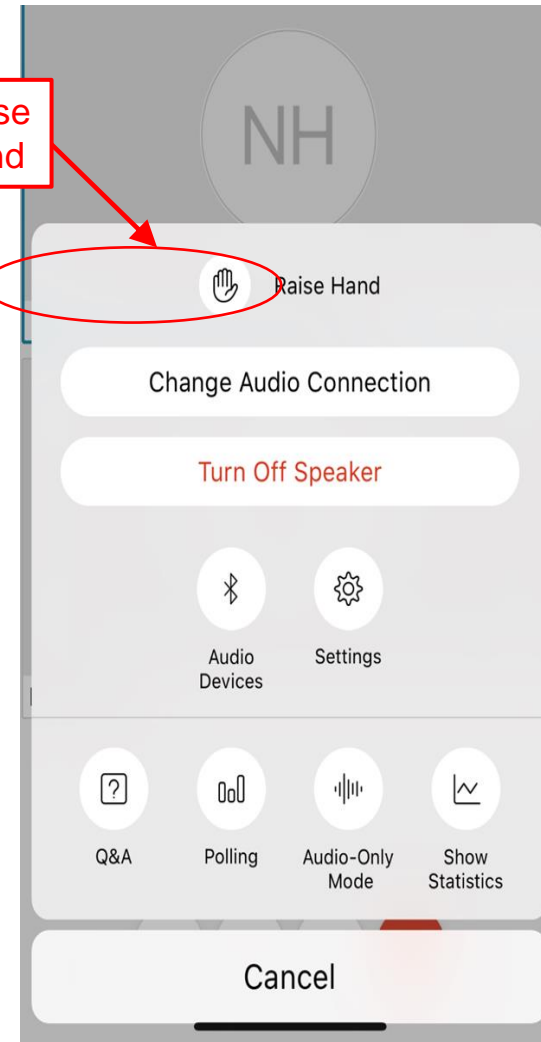

After you have been called or spoken, click the hand symbol icon again to lower your hand.

Attendee Poll: SMBP Technology Challenges

- What technology challenges are you facing with SMBP implementation?
 - EMR interoperability
 - Access to devices
 - Tech literacy
 - Data transfer
 - Other – please describe

Agenda

- **Welcome, Introductions, and Agenda Overview**
 - Rita Lewis, MPH, CPHQ, NACHC
 - Judy Hannan, RN, MPH, Million Hearts[®], CDC
- **National Assessment of SMBP Health IT Landscape**
 - Lura Daussat, MPH, Director of Practice Support, Public Health Informatics Institute
- **Open Discussion of Findings with Q&A**
 - Facilitated by Hilary Wall, MPH, Million Hearts[®], CDC
- **SMBP Forum Sharing: What SMBP health IT solutions have you discovered?**
- **Updates, Additional Resources, and Closing**
 - Million Hearts[®] SMBP Forum webpage and resources – Rita Lewis, MPH
 - Upcoming Hypertension-related Events – Rita Lewis, MPH

Today's Objectives

- Highlight findings from the National Assessment of SMBP Health IT Landscape
- Address questions regarding the National Assessment
- Explore new or supplemental strategies to solve key SMBP health IT challenges
- Share best practices and potential solutions to overcome SMBP health IT challenges

Self-Measured Blood Pressure Monitoring (SMBP)

National Assessment of SMBP Health IT Landscape

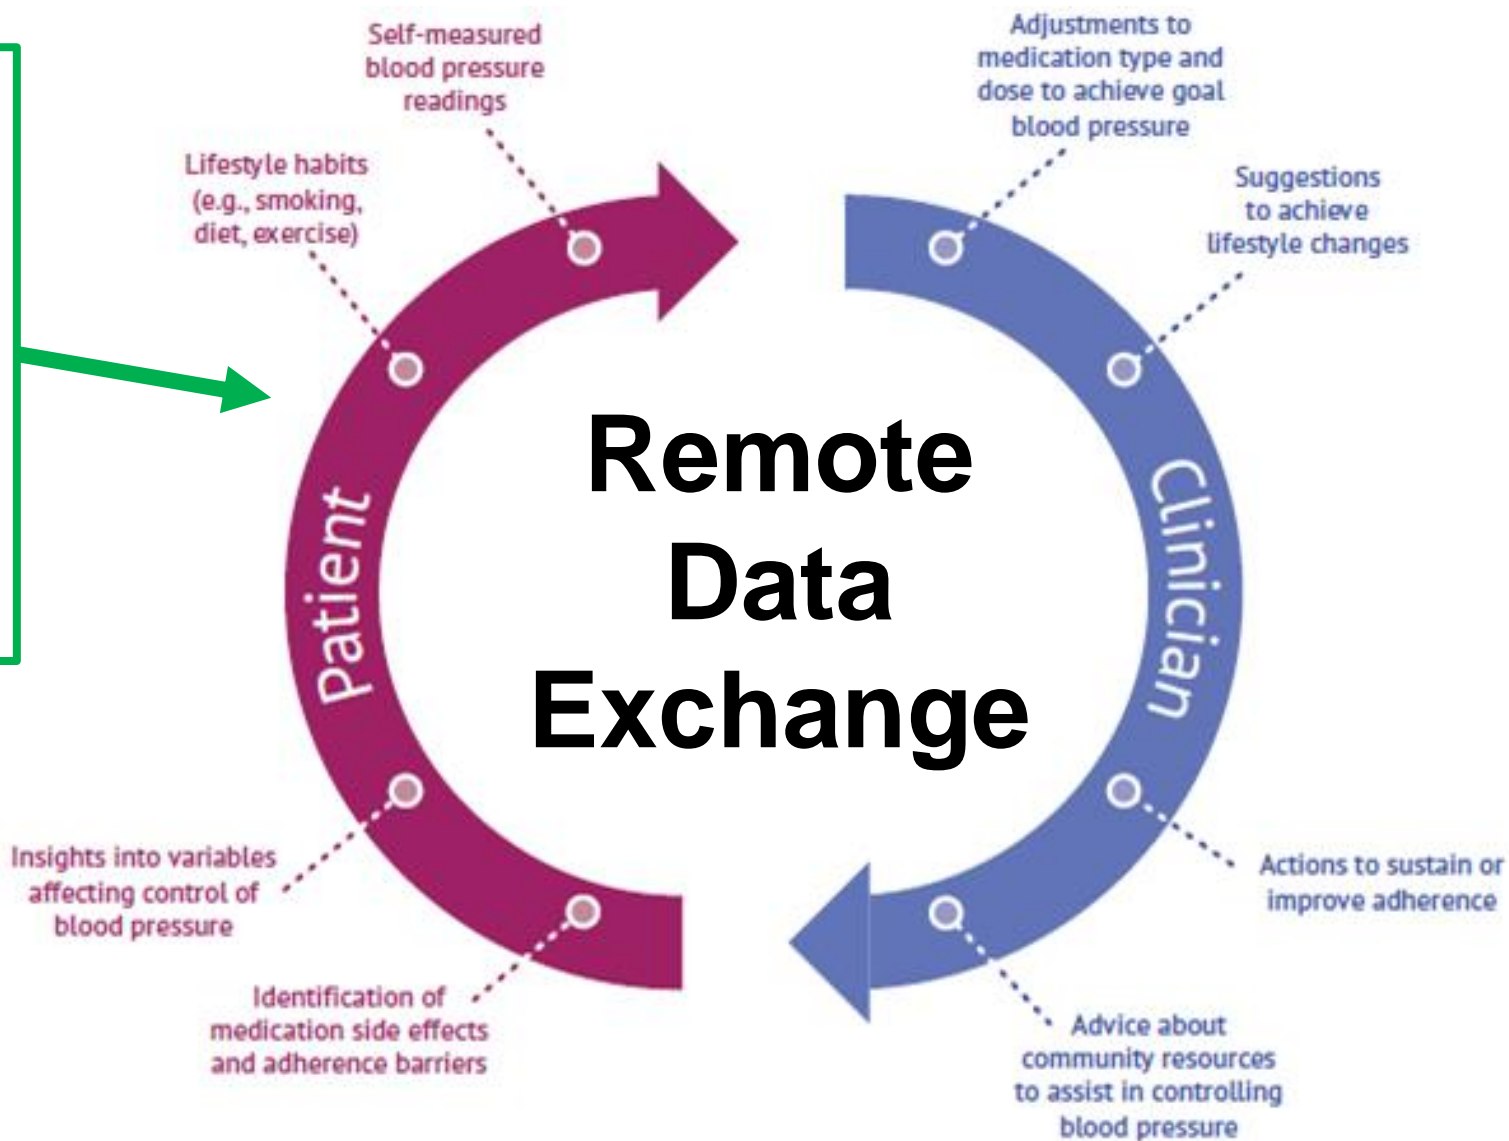

Million Hearts SMBP Forum

September 9, 2021

Optimal SMBP

Clinician guidance on:

- Selecting a device
- Proper cuff sizing
- Preparation and positioning
- Clinical protocol with frequency and duration
- Method for returning patient-generated values

Adapted from:

- U.S. Department of Health and Human Services. The Surgeon General's Call to Action to Control Hypertension. Washington, DC: U.S. Department of Health and Human Services, Office of the Surgeon General; 2020
- Centers for Disease Control and Prevention. Self-Measured Blood Pressure Monitoring: Actions Steps for Clinicians.

2019 BRFSS SMBP Analysis

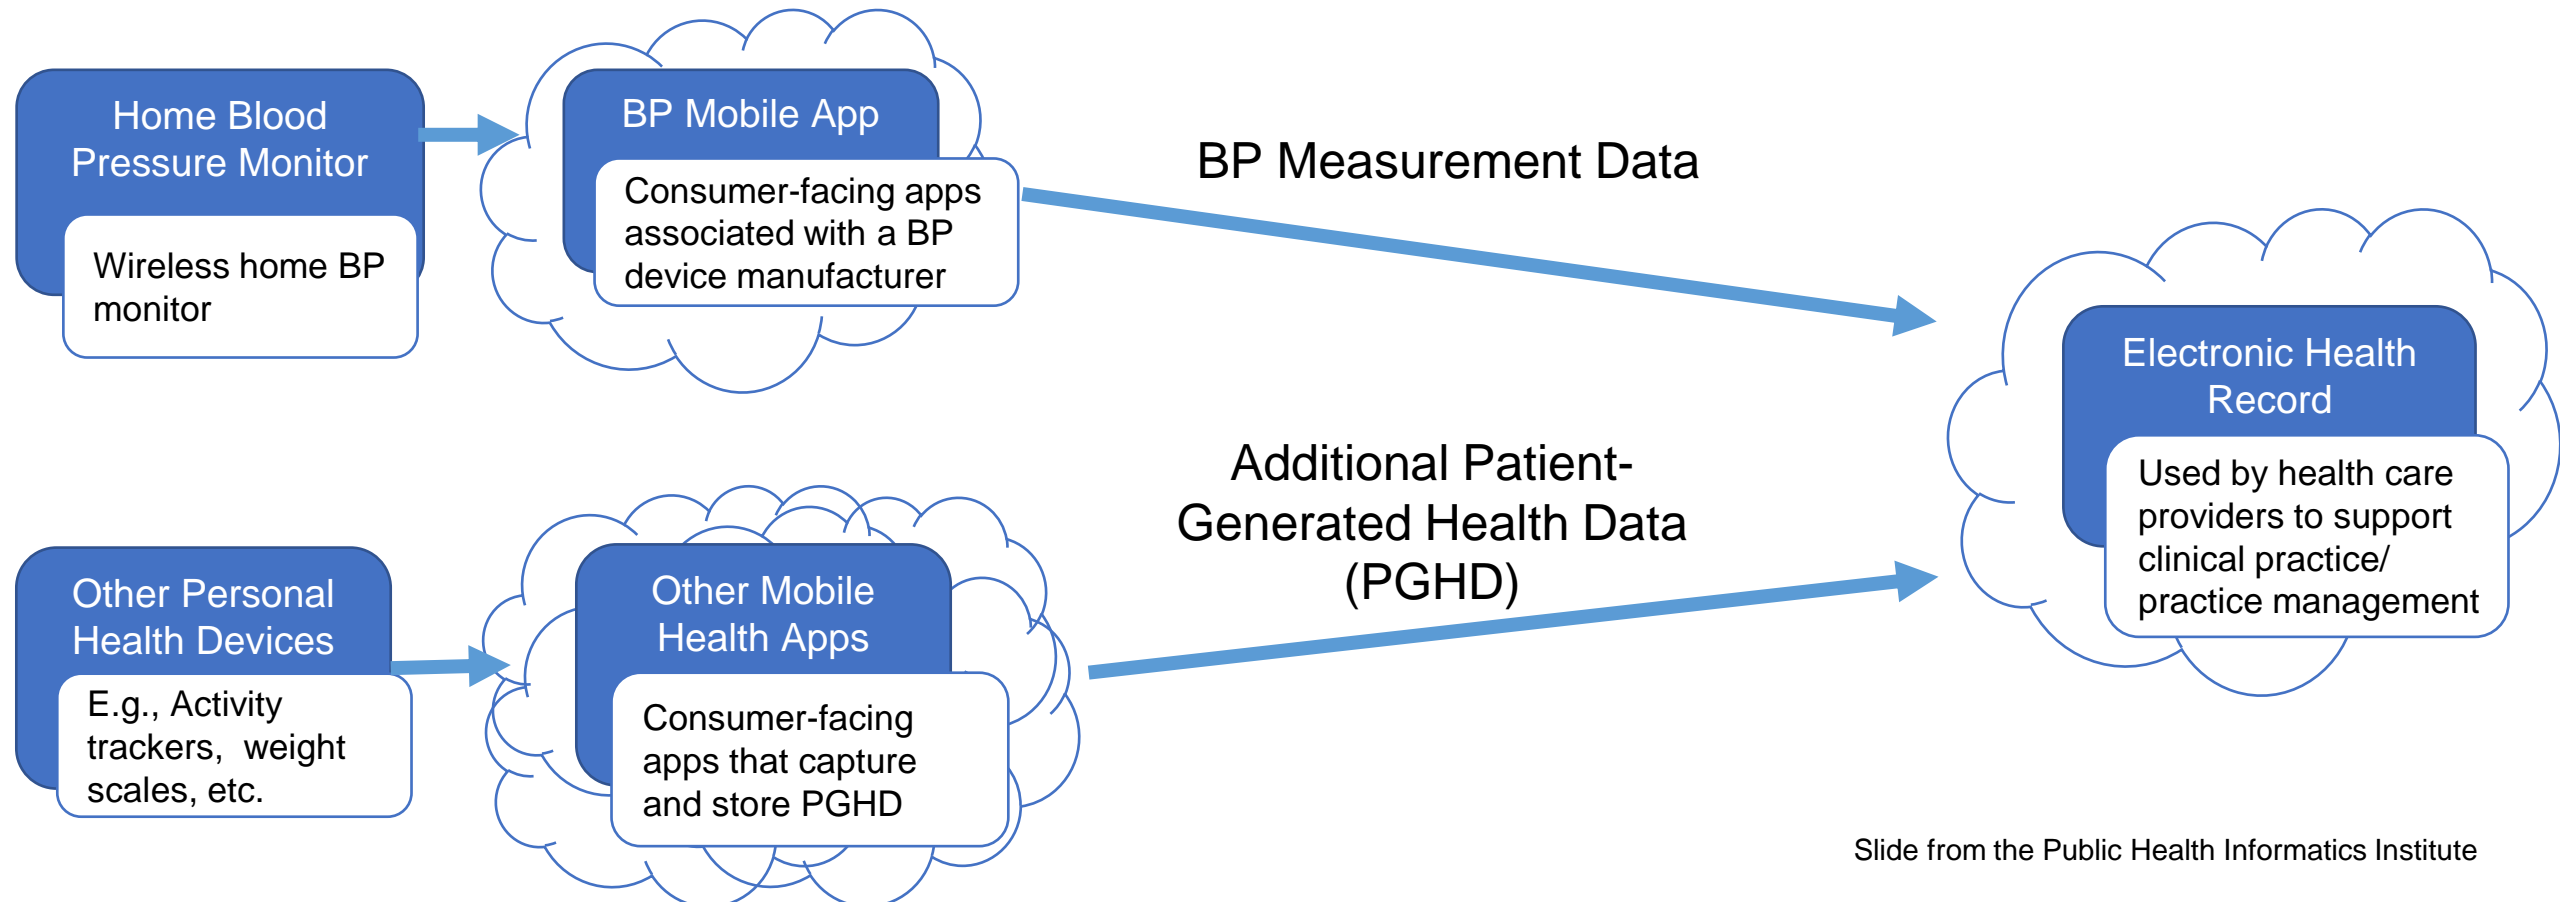

- 20 states + DC
- 61% of those with self-reported HTN reported checking BP “outside of the office”
 - >80% shared readings with healthcare professionals
 - 7% via internet/email

Perceived SMBP Health IT Landscape

Patient

Clinician/ Care Team

Project Background

- Document the informatics landscape of SMBP HIT
- Goal:
 - Identify recommendations to achieve more widespread implementation of SMBP
 - SMBP in Practice
 - Regulatory and policy
 - Standards and interoperability

Project Team

CDC/Million Hearts (project sponsor)

- Hilary Wall, technical monitor
- Camilia Easley
- Haley Stolp
- Sharada Shantharam
- Taylor Streeter

Agency for Healthcare Research and Quality/CEPI

- Janey Hsiao

Health Resources and Services Administration

- Ayanna Williams
- Anthony Jordan

NIH/National Heart, Lung, and Blood Institute

- Vandana Sachdev

Office of the National Coordinator for Health Information Technology

- Kevin Chaney
- Allison Dennis
- Tracy Okubo

Public Health Informatics Institute

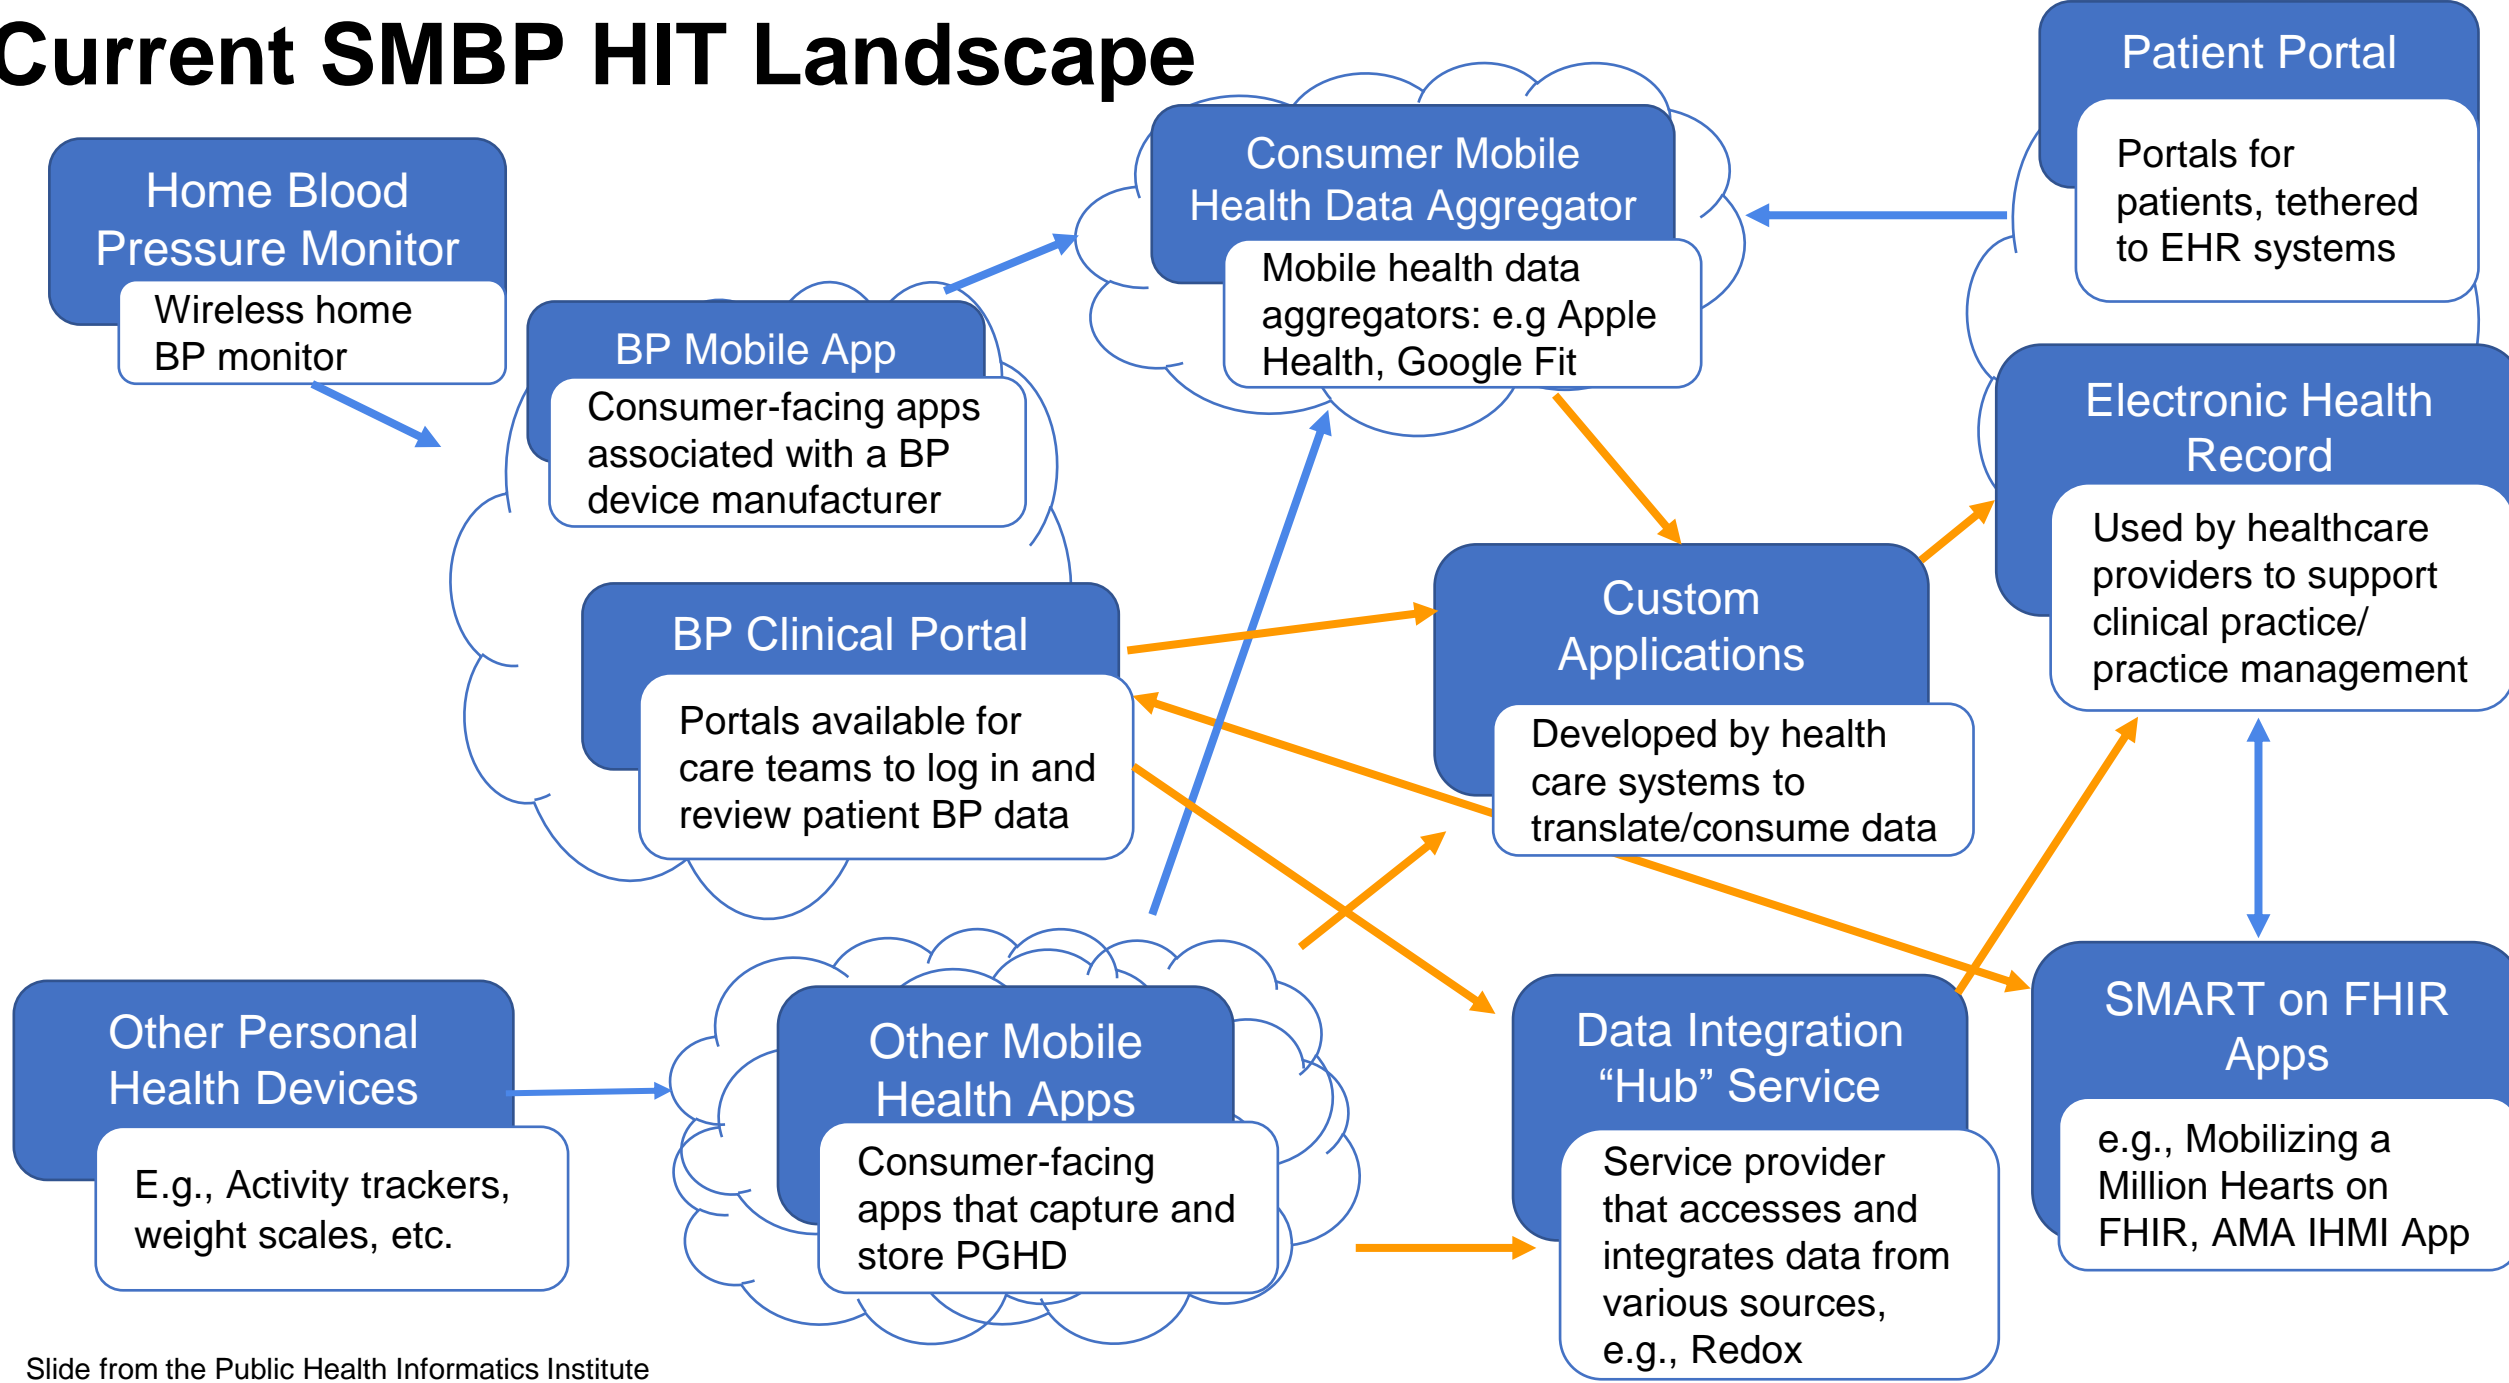

- Lura Daussat, Project Director
- Ashley Nash, Project Manager
- Carol McPhillips-Tangum

Key Informant Interview Participants

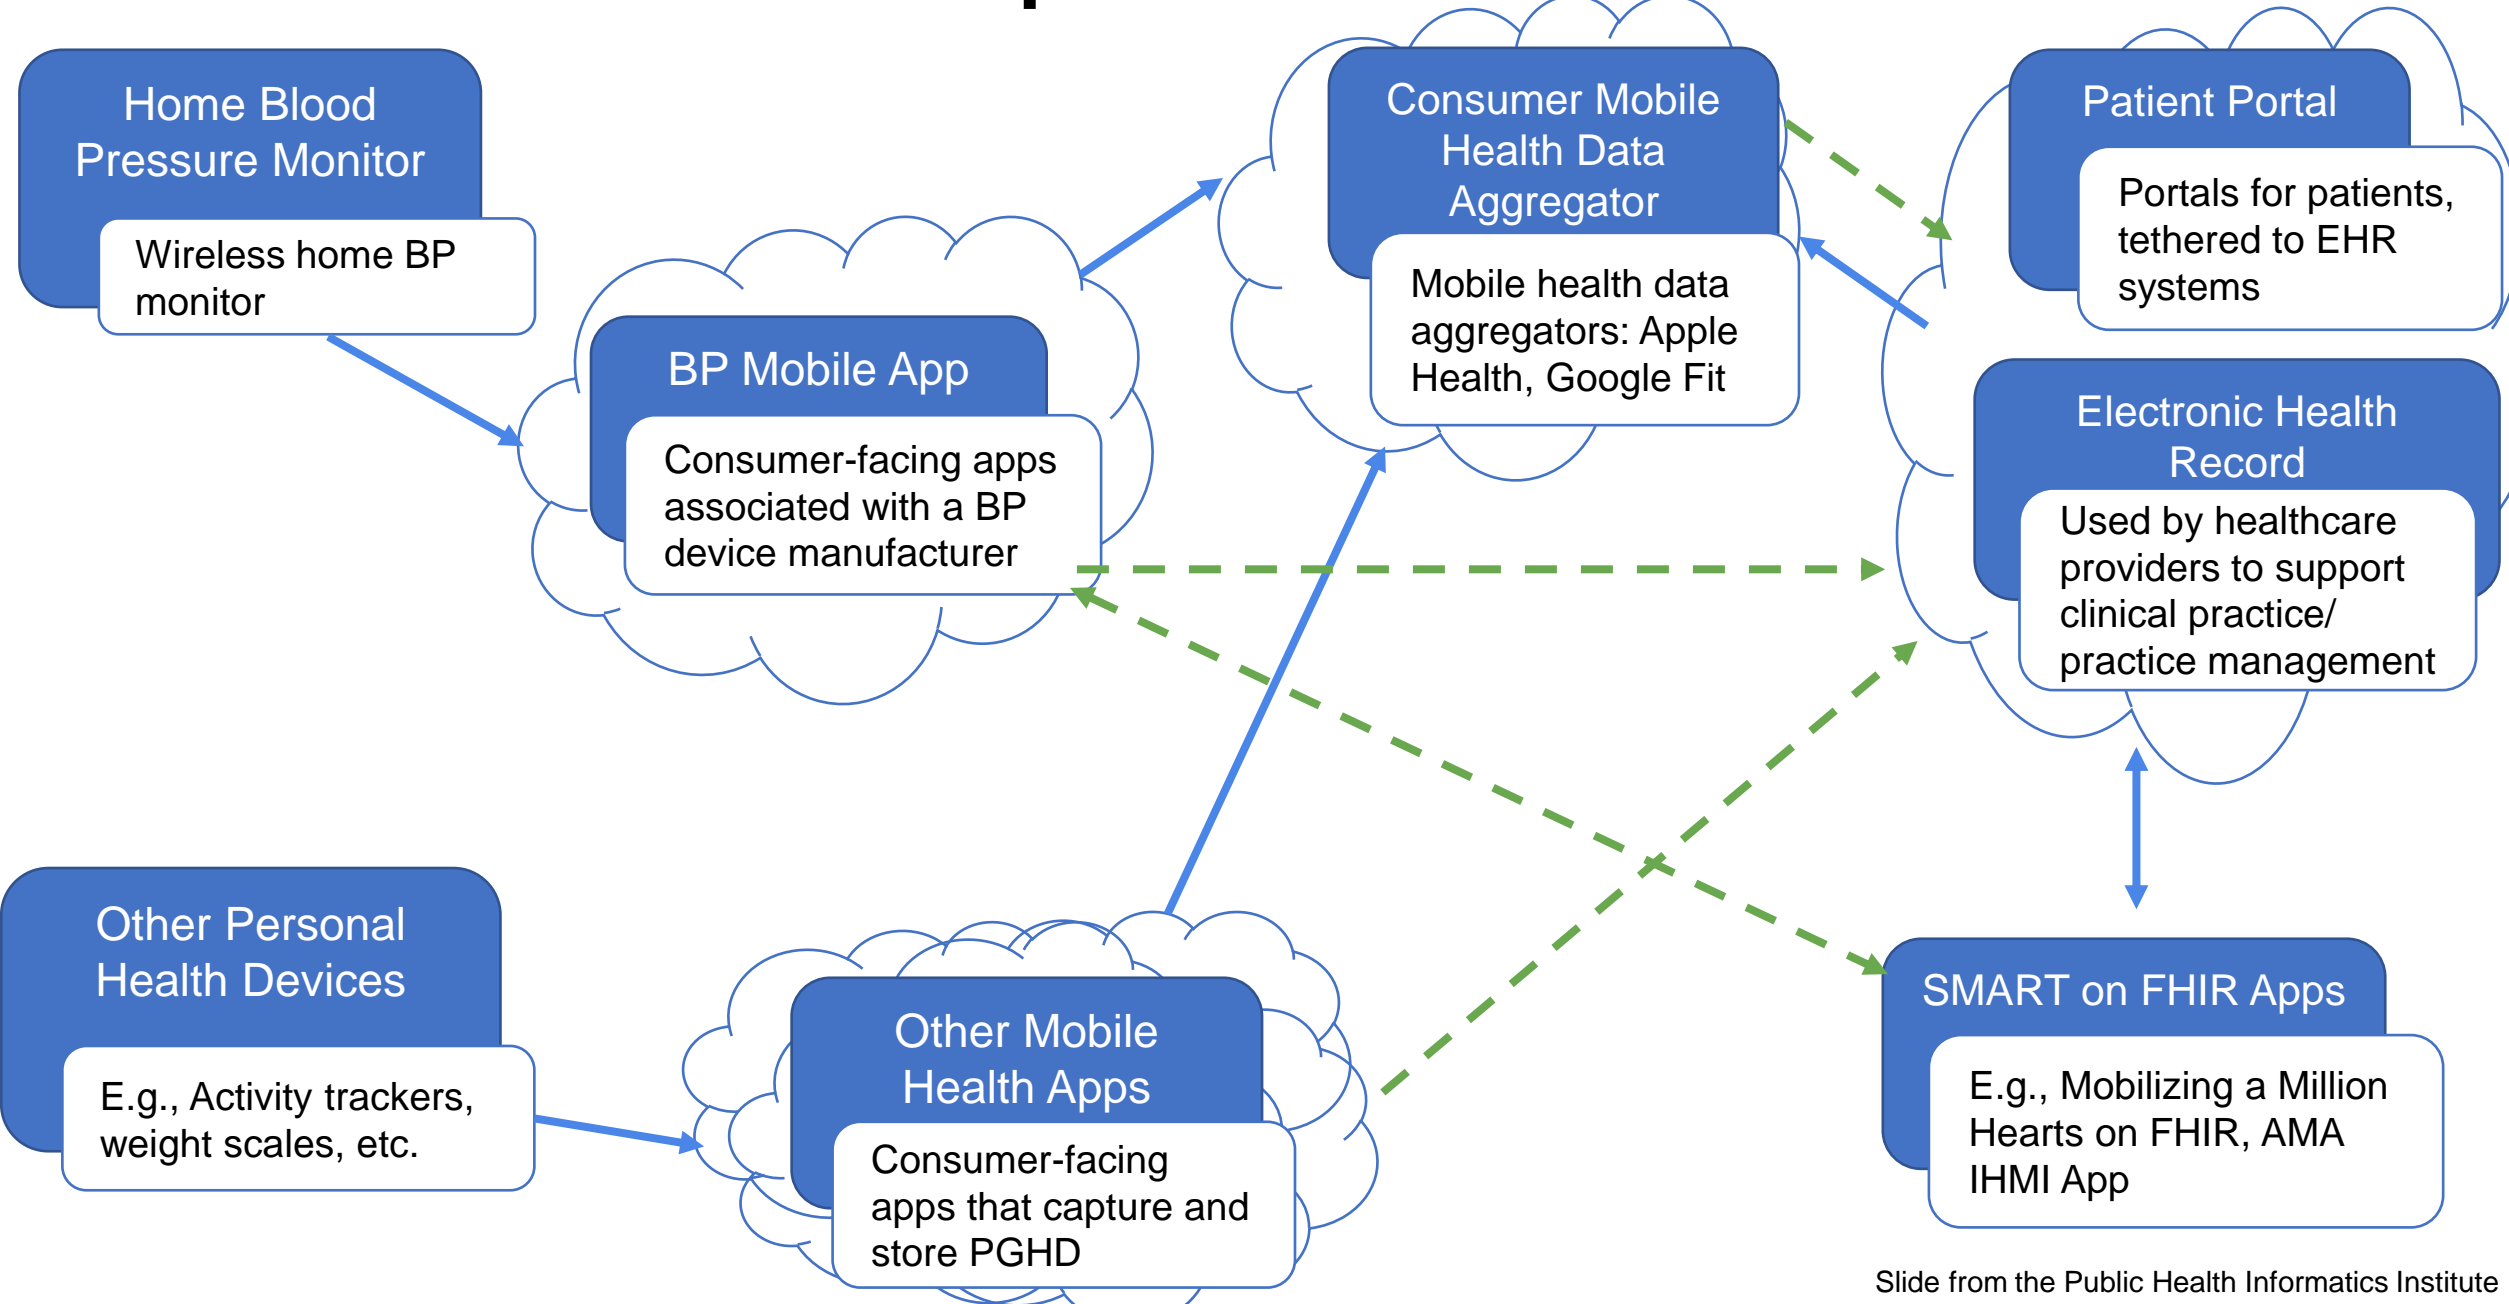

- Reliant Health, Ochsner Health, Health Federation of Philadelphia
- SMART Markers/FHIR (Kenneth Mandl, Raheel Sayeed)
- Open mHealth (Ida Sim)
- HL7 Devices Work Group
- HL7 Mobile Health Work Group
- HL7 Patient Empowerment Work Group

Current and Future Landscape

Current SMBP HIT Landscape

Potential Future Landscape

Key Findings of National Assessment of SMBP HIT

SMBP in Practice

Challenge	Potential Solution
Patients need technical assistance for technology	Federal-level ‘Geek Squad’/’Genius Bar’ resource to improve digital literacy and work toward resolving the digital divide.
Who owns the data?	Support policies that make patients the owner of any patient generated data entered by them. “Any data in a device belonging to a patient is owned by the patient”
Too many data points, hard to find in clinical workflows.	Develop user-friendly patient application(s) that can both obtain PGHD and SMBP measurements and seamlessly integrate that information into the EHR to make clinical workflows more efficient

Regulatory and Policy

Challenge	Potential Solution
<p>PGHD might be more at risk for security breaches and misleading use of the data outside of the original intent due to third party vendors not having the same security laws as HIPAA-covered entities.</p>	<p>Support the development a privacy and security framework that would hold non-HIPAA-covered entities to the same standards as HIPAA-covered entities</p>
<p>Healthcare providers are concerned about the need to adhere to HIPAA when accessing and using data obtained and held by third parties.</p>	<p>Create a business associate agreement template for organizations that aim to partner with HIPAA-covered entities</p>

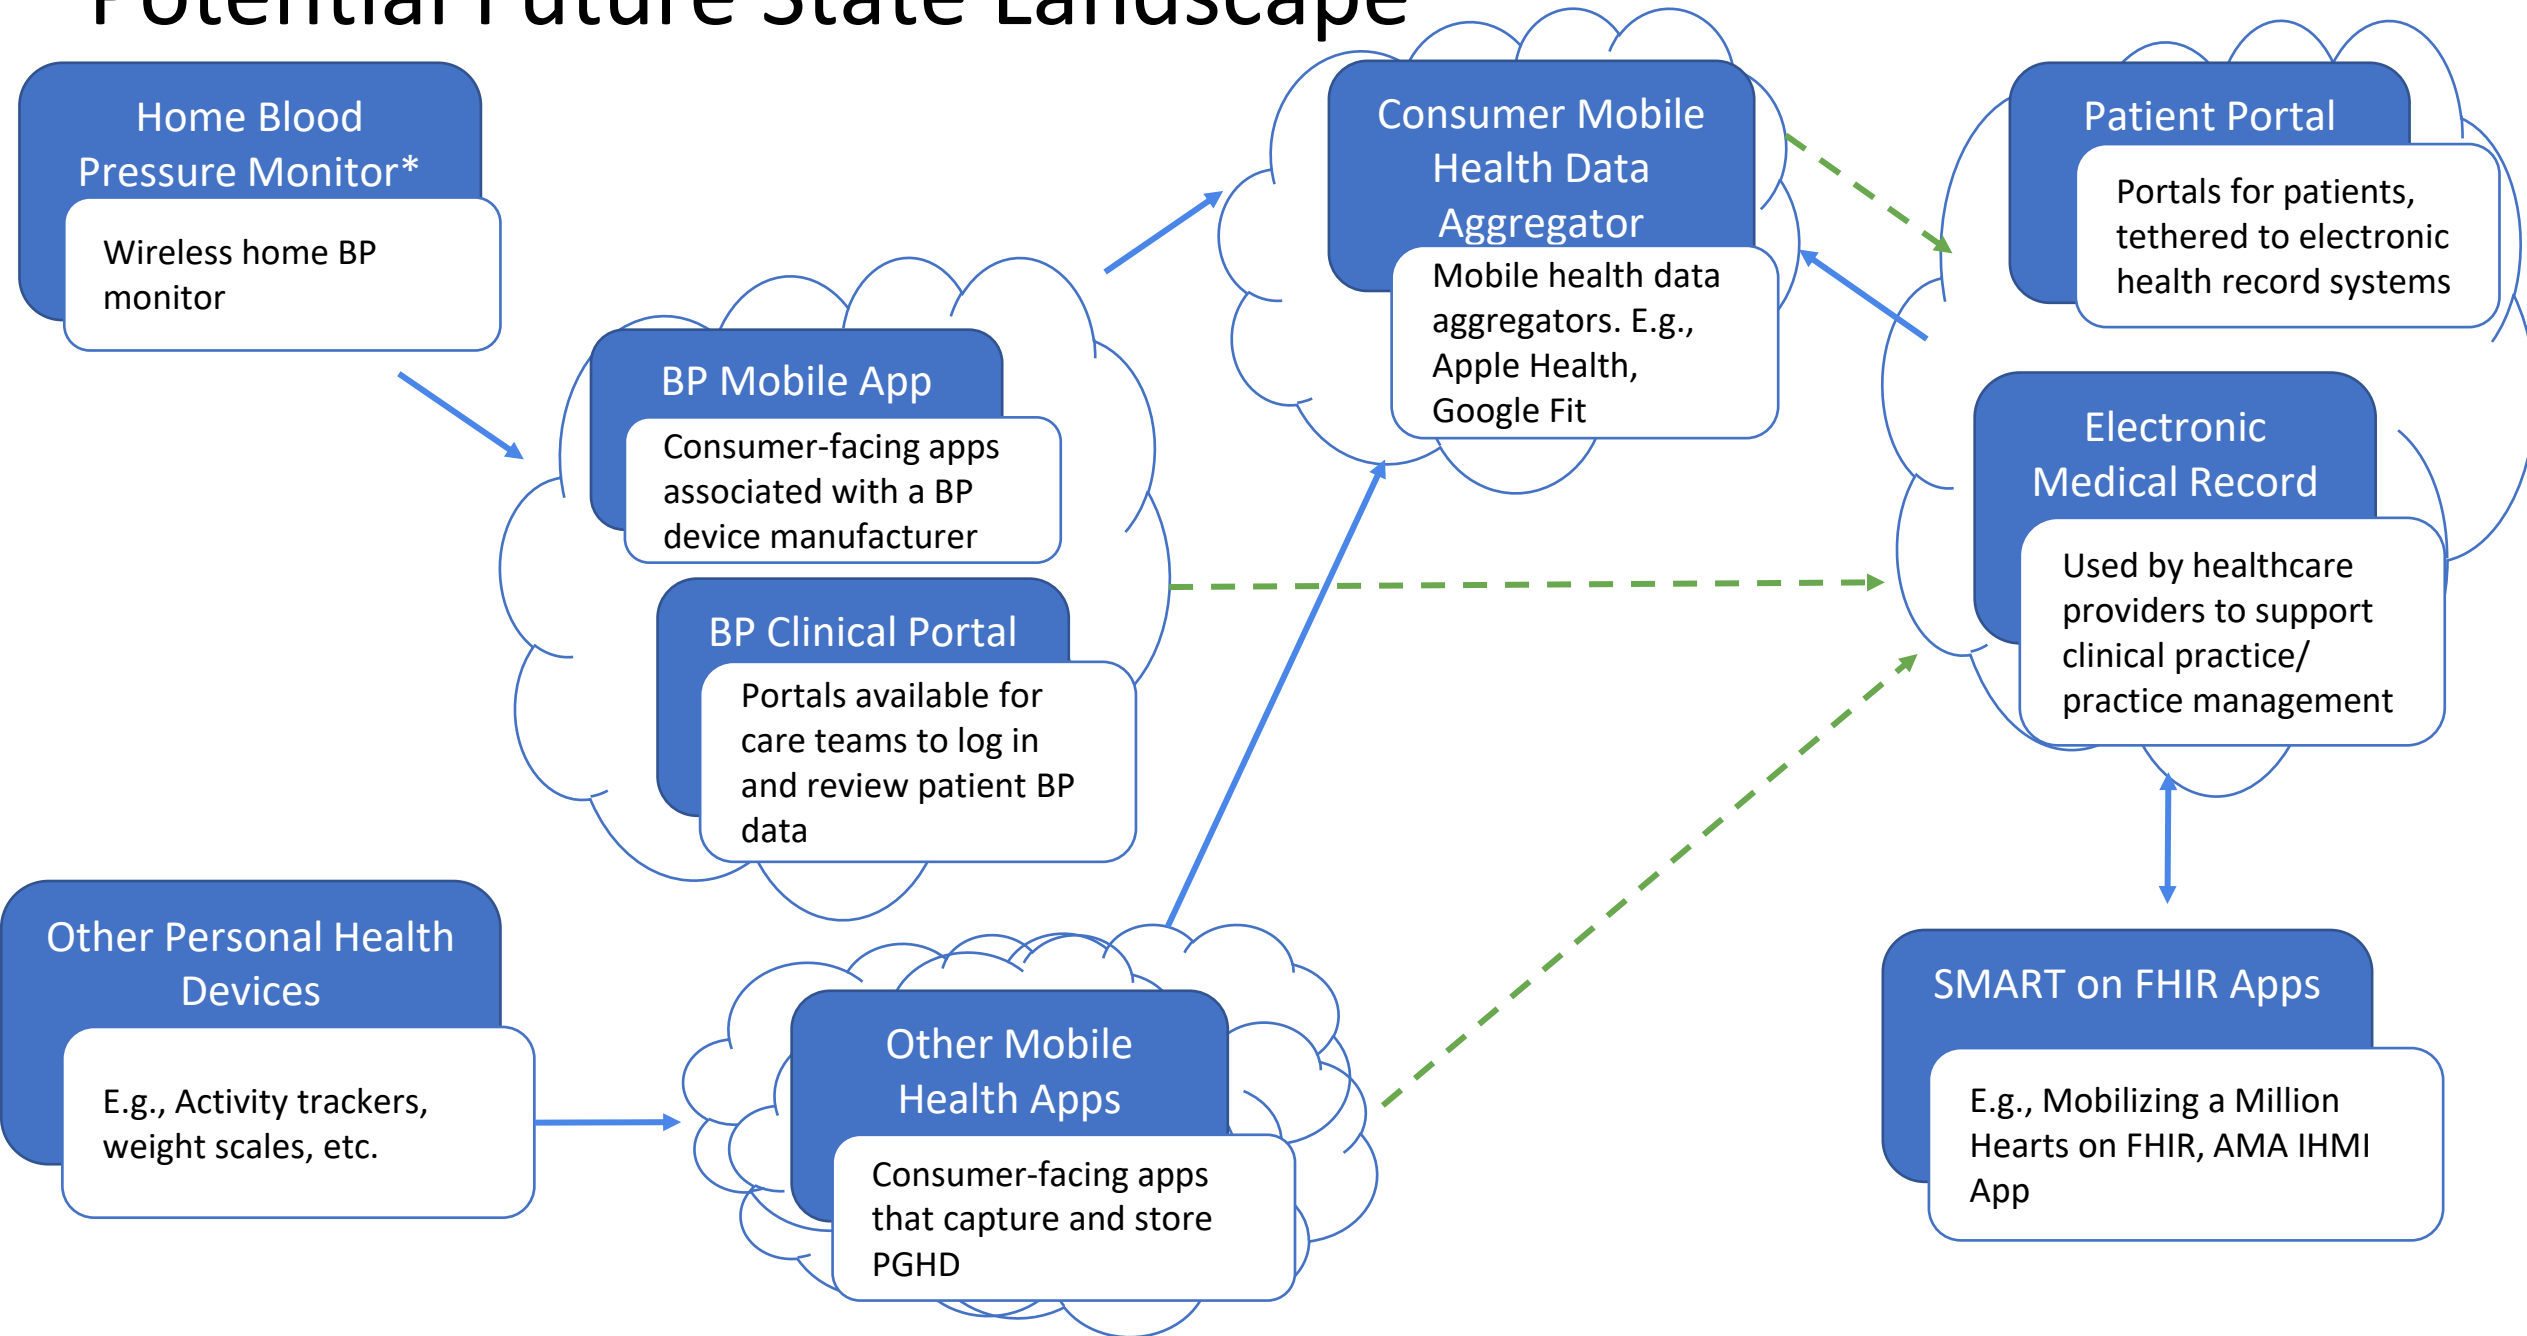

Regulatory and Policy (cont'd)

Challenge	Potential Solution
Misalignment between preferred devices and existing coverage	Ensure sufficient coverage for validated devices that meet nationally recommended criteria (e.g., automatic arm devices, blue-tooth-enabled). Support policies that drive the purchase of quality devices.
Providers are concerned about medical liability in having documentation for their clinical decision-making.	Develop standards of care to assist healthcare providers in clinical decisions based on PGHD blood pressure readings. How the data are received, parsed, and stored should be standardized and universally implementable.
Healthcare providers are also concerned about medical liability in having potentially real-time access to SMBP and PGHD. Providers are concerned they need to respond to each abnormally high value reported.	Develop protocols and guidance for patients and providers around how and when SMBP data will be reviewed and used and when and how follow-up will occur.

Interoperability Standards and Specifications

Challenge	Potential Solution
There is no common or overarching implementation framework to support the movement of data to EHRs	Develop an implementation framework to support the movement of SMBP data to EHRs
There is no guidance on how to implement standards-based use of APIs to enter data into an EHR (FHIR write capability)	Develop implementation guidance focused on use of the FHIR write capability to enter data into an EHR. Expand requirements for EHR certification to include write access.
Lack of incentives for device manufacturers, mHealth application developers, and EHR vendors to support adoption of standards and specifications for the exchange of PGHD	Incentivize device, mHealth, and EHR vendors to adopt PGHD-related standards and specifications
Standards are slow to adopt ; the market is faster than standards.	Consider an HL7 FHIR Accelerator approach to accelerate the specifications process related to patient-generated data in clinical care. PHI.org

Potential Future State Landscape

Texting

to Support Community Health Centers' Outreach

Tuesday, September 21 | 1:00-2:00pm EDT

The CareMessage team will share recommendations for outreach to patients around COVID-19, gaps in care management, and social determinants of health.

PRESENTERS:

Vineet Singal | Co-Founder and CEO, CareMessage

Julia Skapik, MD, MPH | Medical Director, Informatics
National Association of Community Health Centers

REGISTER TODAY!

NACHC Resources

DECEMBER 2020

INSTRUCTIONS:

- 1 Complete [Determining Your SMBP Goals and Priority Populations](#)
- 2 Work through the [SMBP Protocol Design Checklist](#)
- 3 Use the [SMBP Tasks by Role](#) and [Aligning your SMBP Patient Training Approach to your Practice Environment](#) diagrams to adapt your SMBP care model to your patients' preferences, staffing capacity, other clinical initiatives or priorities, and local environment.

SMBP MONITORING TASKS BY ROLE

From: [Accelerating Use of Self-measured Blood Pressure Monitoring \(SMBP\) Through Clinical-Community Care Models](#)

MUST BE DONE BY LICENSED CLINICIAN

- 1 Diagnose hypertension
- 2 Prescribe medication(s)
- 3 Provide SMBP measurement protocol
- 4 Interpret patient-generated SMBP Readings
- 5 Provide medication titration
- 6 Provide lifestyle modification recommendations

MUST BE DONE BY PATIENT

- 1 Take SMBP measurements
- 2 Take medications as prescribed
- 3 Make recommended lifestyle modifications
- 4 Convey SMBP measurements to care team
- 5 Convey side effects to care team

CAN BE DONE BY SMBP SUPPORTER^a

- 1 Provide guidance on home blood pressure (BP) monitor selection
- 2 If needed, provide home BP monitor (free or loaned)
- 3 Provide training on using a home BP monitor
- 4 Validate home BP monitor against a more robust machine
- 5 Provide training on capturing and relaying BP values to care team (e.g., via device menu, patient portal, app, log)
- 6 Reinforce clinician-directed SMBP measure
- 7 Provide outreach support to patients using
- 8 Share medication adherence strategies
- 9 Provide healthy lifestyle education

OPTIONAL SMBP SUPPORTER TASKS

- 1 Reinforce training on using a home BP monitor

SMBP DATA MANAGEMENT

<input type="checkbox"/> Determine how patients will record/share data with the care team	Our protocol:
<input type="checkbox"/> Determine what types of SMBP measurements clinicians want to see	<input type="checkbox"/> 7-day SMBP average <input type="checkbox"/> All individual home <input type="checkbox"/> Outlier BP reading
<input type="checkbox"/> Determine what additional SMBP-related data elements are important to capture (e.g., flagging patients for SMBP, date started/completed SMBP, number of measurements/days, reason for SMBP, treatment decisions, etc.)	Our protocol:
<input type="checkbox"/> Determine where SMBP data will be documented (may require custom HIT configuration)	<input type="checkbox"/> Direct to EHR from <input type="checkbox"/> Manually document <input type="checkbox"/> Population Health <input type="checkbox"/> Spreadsheet <input type="checkbox"/> Vendor Portal <input type="checkbox"/> Other
<input type="checkbox"/> Determine when and at what frequency clinicians want to review SMBP data (i.e., where and in what format does it fit in the workflow)	Our protocol:
<input type="checkbox"/> Determine if SMBP is having desired effect (i.e., how will you know it's working?)	Our protocol:

New SMBP Forum Online Portal!

Confluence Features

- No Login required!
One click access.
- Easy access to folders
- Calendar of events
- Upload resources to share
- *More information to come!*

Confluence Portal Preview

A screenshot of the Confluence web interface. The page title is "Million Hearts SMBP Forum" and it was created by Rita Lewis. The main content area features the Million Hearts logo and a green-bordered box with a welcome message. The message states: "Welcome to the Million Hearts SMBP Forum on Confluence! Million Hearts self-measured blood pressure monitoring (SMBP) is a collaborative community of practice to advance the use of SMBP nationally as a proven strategy to improve hypertension control and prevent heart attacks and strokes. To navigate this community, use the search bar above for keywords or specific items you're seeking or simply browse the modules below. Some keywords to get you started are videos, toolkits, guidelines, articles, and webinars. All resources include the first author or organization and year, if applicable. The discussion board can be used to engage colleagues and experts, while What's New gives updates on new resources added to the community and dates for upcoming SMBP related webinars and events. Use the 'Community Sharing' folder to add your SMBP related tools and resources to the site. To access this folder, click on **Tools & Resources** and then select **Community Sharing**." Below the message is a section titled "Announcements and New Information". On the right side, there is a "Table of Contents" with links to "Announcements and New Inform...", "Quick links to Frequently Used Reso...", and "SMBP Forum Files and Resources". The top navigation bar includes "Confluence", "Spaces", "People", "Dashboards", "Personal Calendar", "Create", and a search bar.

Million Hearts[®] SMBP Forum

- Quarterly webinar to facilitate the exchange of SMBP best practices, tools, and resources across clinical, public health, and community-based partners

Registration instructions:

1. Go to the SMBP Forum Registration Page: http://bit.ly/SMBP_Registration
2. Select the meeting(s) you want to attend in 2021 and click 'Register'
3. Complete the registration questions
4. Look for the calendar invite(s) from WebEx (be sure to check your spam folder!!)

- Past SMBP Forum recordings/materials can be accessed at <https://confluence.nachc.org/display/SMBP/Quarterly+Meeting+Materials>
- Questions can be sent to MillionHeartsSMBP@nachc.org

Information Series for Adults
What You Need to Know About Heart Disease and Adult Vaccines

Each year thousands of adults in the United States get sick from diseases that could be prevented by vaccines — some people are hospitalized, and some even die. People with heart disease and those who have suffered stroke are at higher risk for serious problems from certain diseases. Getting vaccinated is an important step in staying healthy.

Why Vaccines Are Important for You

Heart disease can make it harder for you to fight off certain diseases or make it more likely that you will have serious complications from certain diseases.

Some vaccine-preventable diseases, like the flu, can increase the risk of another heart attack or stroke.

Immunization provides the best protection against vaccine-preventable diseases.

Vaccines are one of the safest way to protect your health, even if you are taking prescription medications.

Vaccine side effects are usually mild and go away on their own. Severe side effects are very rare.

Getting Vaccinated

You may regularly see a cardiologist, or your primary care provider. Either is a great place to start if your healthcare professional does not offer the vaccines you need, ask for a referral so you can get the vaccines elsewhere.

Adults can get vaccines at doctors' offices, pharmacies, workplaces, community health clinics, health departments, and other locations. To find a place near you to get a vaccine, go to <http://vaccines.healthmap.org>.

Most health insurance plans cover recommended vaccines. Check with your insurance provider for details and for a list of vaccine providers covered by your plan. If you do not have health insurance, visit www.healthmap.gov to learn more about health insurance options.

For more information on vaccines or to take an adult vaccine quiz to find out which vaccines you might need, visit www.cdc.gov/vaccines/adults.

What vaccines do you need?

Flu vaccine every year to protect against seasonal flu

Pneumococcal vaccine to protect against serious pneumococcal diseases

Tdap vaccine to protect against tetanus, diphtheria, and pertussis (whooping cough)

Zoster vaccine to protect against shingles if you are 50 years or older

There may be other vaccines recommended for you so be sure to talk with your healthcare professional about what is right for you.

DON'T WAIT. VACCINATE!
